

FORM CONNECT® LUMBER CONNECTOR

APERTURES

- Available in regular and counter sunk types of apertures
- Counter sunk apertures are used to connect the Form-Connect® with the lumber form using screws to create a flat surface
- Regular apertures
- Enough number of apertures to accommodate different jobs and lumber conditions

END PANEL

- Protect the end of your priceless lumber so that you can use it "AGAIN" and "AGAIN"
- Quick connect your form boards
- Minimize the utilization of wood stakes and kickers
- No Toe-Nailing and Joiner anymore
- Secure forms strongly in vertical direction

MIDDLE PANEL

- Creates smooth finish at the face of concrete poured
- Provides access for edging concrete poured
- Protects the end of your priceless lumber
- Additional security on lumber connections

BOTTOM PANELS

- Self alignment for horizontal connection
- Assists form setter to install the form board
- Minimizes error in the lumber installation

Available in different common sizes of lumber
2x6, 2x8, 2x12
