PROJECT LEADS

Contractor
Golden State Concrete, Irvine, CA

Owner
Jessie Orozco

PRODUCTS USED

#10002-A Assy Truhold 5/8"

#10002-D Assy Truhold 7/8"

Golden State Concrete, Irvine, CA

CHALLENGES

- Post tension
- Methane barrier
- Numerous hold-down's
- Hard time constraint

SOLUTIONS

- Utilize Tru-Hold anchor bolt placement holder instead of holdems

RESULTS

- Simple accurate install
- Significant labor cost savings due to less re-work and repair

Golden State Concrete utilizes Tru-Hold® to save time & money

Thinx R&D Corp. Tru-Hold anchor bolt placement holder helps Golden State Concrete meet hard deadline while yielding serious cost savings.

Project Overview

Foundation for large new condominium complex located in Irvine, CA.

Project Challenges

Slabs were post-tension with methane barrier and had numerous HD15 and HDA10-A hold-downs. There was a hard time constraint to complete project.

Solutions

Utilized Tru Hold anchor bolt placement holders for quick and accurate installations. Left all anchor bolt placement holders in place for inspection and for pouring. Saved significant time by eliminated anchor bolt repair and re-work. Also freed-up workers to focus on other areas.

Savings Summary

Noticed significant savings eliminating:

1. re-work
2. bolt repair (including cost savings on epoxy, tools, and labor)
